

2021-02-09 - VIVO Development IG

Date

09 Feb 2021

Call-in Information

Time: 11:00 am, Eastern Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://lyrasis.zoom.us/my/vivo1?pwd=a2Q3RUVKVkN2dkNHV3FUaFRtLzhGdz09>
 - Passcode: 351860
- One tap mobile:
 - US: +16699006833,,9358074182# or +19292056099,,9358074182#
- Or Telephone:
 - US: +1 669 900 6833 or +1 929 205 6099 or 877 853 5257
 - Meeting ID: 935 807 4182
- International numbers available: <https://zoom.us/j/aeANHanzED>

Slack

- <https://vivo-project.slack.com>
 - Self-register at: <http://bit.ly/vivo-slack>

Attendees

★ Indicating note-taker

1. [William Welling](#)
2. [Andrew Woods](#)
3. [Brian Lowe](#)
4. [Benjamin Gross](#)
5. [Nicolas Dickner](#)
6. [Georgy Litvinov](#) ★
7. [Ralph O'Flinn](#)
8. [Huda Khan](#)
9. [Alexander \(Sacha\) Jerabek](#)
10. [Don Elsborg](#)

Agenda

1. A new season for the development community
2. Consolidate

- a. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- b.
- c. *digest.mds* implementation questions

3. Releasing a 1.12 alpha

- a. Tickets to

i.

ii.

iii.

iv.

v.

vi.

vii.

viii.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- b. Timing

- i. 1.12 alpha-1: Feb 15th

1. Two week RC-1 testing period

2. For each subsequent RC-2 (if required), adding another two weeks to the schedule

- c. Process
- d. Communication
- 4. New dev
 - a.
- 5. Post-i18n
 - a. vivo-in-a-box
 - b. Ingest / Kafka
 - c. Advanced Role Management
 - d. Moving Scholars closer to core - [next steps](#)

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Future topics

1. [Vitro JMS messaging approaches](#) - redux
 - a. Which architectural pattern should we take?
 - b. What should the body of the messages be?
2. [Renaming of 'master' branch?](#) (ZDNet, BBC)
 - a. [Guidance](#) from GitHub
 - b. DSpace has done it
 - c. Fedora has done it
 - d. Samvera is doing it

3. Incremental

a.

b.

c.

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Tickets

1. Status of In-Review tickets

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due

Notes

[Draft notes in Google-Doc](#)

As Andrew is leaving Zoom links are going to be changed.

Significant milestone is going to be achieved with the merging of vivo-1958. Brian reviewed and tested new changes. Ralph was doing sanity checking. Checked new building process. Checked on multiple systems like Windows, Mac and Linux, multiple browsers. Ralph is working on checking i18n.

1. I18n Pull requests

Andrew asks about pull requests.

Either merge PR today or get some feedback on them. Some tickets on hold because of them.

Ticket 1958 should help with testing new functionality.

No code review expected at this point. There already have been code reviews.

Need basic testing.

William will try to test, at the same time VIVO needs a lot of resources for testing.

2. Digest file

Digest file is now being created. The idea is now with 1959 we copy war file in tomcat. When tomcat starts VIVO Home directory got populated with war contents. As a part of that VIVO creates an md5 base file. With tomcat restart digest file is being read to find changes since last startup with files in VIVO Application. If files in war and on disk differ then files in home directory rewrites only if they were not changed. Digest file gets updated every time VIVO restarts.

On restart it recreates files map with md5.

Only untouched files are getting overwritten.

If somebody want to look at this - you are welcome.

Benjamin says it works good.

3. Tickets to be closed

Ticket 1802 Nicolas says it is expected behaviour. Ticket should be closed.

4. Putting out alpha release

We want to ensure users can upgrade. Upgrade should work with i18n and without it.

People in both scenarios should have upgrade instructions without issues.

All 1958 dependencies should be resolved shortly.

Merge all by the end of the week.

Reshuffling of RDF is ok for now as it doesn't create any problems.

Given the pace of things Andrew wont be able to push Alpha and RCs.

Timing, Process, Communication with community

Release on monday or next week ? Release alpha by the end of next week.

Send announcement for the community that alpha is ready, test it.

Encourage testing! A day for extensive testing RCs after internal testing alpha.

Advanced role management

[VIVO-1436](#) It was targeted against main. Could have merge conflicts after 1958.

It could not be merged in 1.12 at this stage.

Plan for merging after 1.12, maybe release in 1.13

Misc

Publish docker container on docker hub to simplify using VIVO.

Individuals removal

George proposed a new configuration property (for example, display: hasDeleteQuery) to associate an ontology class with a query to retrieve dependent individuals ~~to be deleted along with the target individual when it is deleted.~~

- Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Actions

-
