DevMtg 2010-09-08

Developers Meeting on Weds, September 8, 2010

Agenda

- JIRA Catch-Up (for first 20 mins or so of meeting) – starting with issue DS-612
    - Search for recent JIRA Issues
- DSpace 1.7 Features/Updates
    - Unclaimed 1.7 Issues/Potential Features in JIRA
    - Other updates ???
- Test Driven Development / Committer Policies
    - As Committers, should we now **require** Unit Testing changes as part of our Guidelines for Committing?
    - These would be similar to Documentation requirements, though may be slightly looser early on (as our Unit Test coverage is only currently limited to the core API). For example:
        - "All changes to core API must pass existing Unit Tests. Existing Unit Tests must also be updated when new methods are added to core API."
        - "New features are **highly recommended** to provide Unit Tests where plausible."

Meeting Notes

JIRA Catchup, 1.7 Updates & Schedule Reminder, Test Driven Development Policies

- JIRA Catchup – ended with issue DS-616
- DSpace 1.7 Updates & Schedule
    - Schedule: Feature Freeze in 6 weeks (Oct 22)
    - Many unclaimed issues still. Volunteer if you can!
    - Richard Rodgers working on Curation code & XMLUI inteface (see branch at: http://scm.dspace.org/svn/repo/dspace/branches/dspace-curation/)
    - Mark Diggory working on Async Release Process changes (see discussion on DevMtg 2010-09-01 as well as prototype at: http://scm.dspace.org/svn/repo/sandbox/dspace-async-prototype/)
- Brief mention of Test Driven Development & Committer Polices. Some positive feedback, but needs to be voted on.
- **Tim will be out of the office next week. Peter Dietz will lead meeting.**
