P&A Use Cases

USE CASES

In the August 26, 2010 P&A conference call, we decided to produce some use cases that deal with preservation and PREMIS. The objective is to establish a small set of use cases and to discuss and resolve some basic questions such as a) platform independence, b) function,structure and format, and c) level of the use case or how micro should these micro-services be?

- Object Integrity Use Case
- Get PREMIS Use Case
    - Sample PREMIS XML
