

The DiVA Project

DiVA

DiVA - Academic Archive On-line, is a publishing system for research and student theses and a digital archive for long-term preservation of publications. DiVA began its development in the year 2000 at the EPC at Uppsala University Library. Today the technical development is driven by the EPC in co-operation with the participating universities and colleges. All universities and publicly financed research institutions both in Sweden and abroad are welcome to join DiVA in its co-operative effort.

Publishing locally at a university or college

The research publications and student theses found in DiVA portal have been published and registered at the university or college of origin. There is bibliographic information in the database for every title and usually an abstract and a link to the full-text at the university or college where it was published. DiVA
