

DevMtg 2011-02-16

Developers Meeting on Weds, February 16, 2011

Agenda

- First 20+ minutes: [JIRA Catch-Up](#) – starting with issue DS-678
 - [Search for all Unresolved Issues \(since DS-678\)](#)
- Based on [Proposal for a New "Feature Request" Review Process](#), Committers should start revisiting/responding to [DCAT](#) comments on JIRA Feature Requests. To get started this week, it'd be good to revisit the first two Feature Requests that DCAT Reviewed:
 - [DS-164](#) - Web Interface for modifying 'input-forms.xml' (DCAT relevancy/interest vote: +4)
 - [Full DCAT Discussion of DS-164](#)
 - [DS-638](#) check files on input for viruses, and verify file format (DCAT relevancy/interest vote: +4)
 - [Full DCAT Discussion of DS-638](#)
 - Elin Stangeland has asked to delay discussion of DS-638 until next week (Feb 23), so that she can attend our meeting
- helix84 (Ivan Masár) has asked if we could try to provide some initial feedback on his recent patch today, as he'll be in attendance:
 - [DS-820](#) : SFX button + SFX in Mirage
- Other Discussion topics?
 - Was 'git' meeting last week useful? Anyone played with git more yet?
- Next "Special Topics" Meeting??
 - Discuss improving how DSpace handles Metadata (*From past meetings discussions, this seems popular*). Several ideas mentioned recently:
 - Updating to current DCMI standards: [DS-805](#)
 - Creating a new "dspace" internal usage schema (for administrative, or non-DC metadata)? Formalize the "dc" schema to be strictly valid QDC/DC?
 - Metadata on all DSpace objects (not just Items)
 - Discuss forming a "Documentation Management Team"? Or reworking our procedures for managing/reviewing/approving Docs on the Wiki.

Meeting Notes:

JIRA Review/Catchup, DCAT Feature Review (DS-164)

Meeting Transcript

- Full IRC Transcript is available at - <http://irclogs.duraspace.org/index.php?date=2011-02-16>
