2022-10 Learn@DLF Workshop - Introduction to Fedora 6.0 Workshop

Where: Learn@DLF Baltimore, MD

When: Oct 9, 2022

Summary

Fedora is a flexible, extensible, open source repository platform for managing, preserving, and providing access to digital content. The Fedora community recently released version 6.2.0, which introduced the Oxford Common File Layout for storage and also offers simple search, and enhanced performance and scale. Both new and existing Fedora users will be interested in learning about and experiencing new Fedora features and functionality first-hand.

Preparations

Slide Deck: Introduction to Fedora 6.0
