Custom Fedora 3.x - Update Client Applications

If you are using a custom front-end for your Fedora repository, you will need to update your client application(s) to work with the Fedora 6.x API.

Objectives

- Update client applications as needed.

Suggested Collaborators

- Project Lead
- Technical Lead
- Developers
- SME on data and data migration

Instructions

Refer to Fedora 3.x to Fedora 6.x API Mapping Documentation for details on differences between Fedora 3 and Fedora 6. This documentation is not intended to be complete.
