Attendees

★ Indicating note-taker

1. [Dragan Ivanovic](#)
2. [William Welling](#) ★
3. [Brian Lowe](#)
4. [Georgy Litvinov](#)

Agenda

1. When and how to align codebase with codestyle?
2. Sample data
 - a. loading large sample data
3. Decoupling build and deployment
 - a. Vitro?

Notes

1. Not yet ready to align codebase with codestyle, it might introduce a lot of merge conflicts in the community customizations/forks and branches (such as Dynamic api branch). Georgy suggested to be strict only with new files which should be aligned with codestyle.
2. There is OutOfMemory issue with loading large sample data. openVIVO sample data might be loaded with a 4GB heap for tomcat, but can't with 2GB. Splitting files into smaller ones is not resolving the issue.
3. Practice of upgrading VIVO within the VIVO community is unclear, therefore it is hard to estimate how many cases <https://github.com/vivo-project/Vitro/pull/370> is covering. Anyway, it is a step forward, it decouples the building and deployment process and we should adopt that as a solution after reviewing and testing.
4. Dragan will prepare VIVO 1.14.0 release candidate number 2, after the testing of release candidate number 1. RC 2 will at least include fixes for some bugs in RC 1 already fixed by Georgy, plus it will include Kevin's contribution for adding a flag for disabling MapOfScience if that is needed for some VIVO adopters.
