Activity of the month: DSpace Talk virtual consultancy

This activity was presented by the eScire project manager in April 2023.

By eScire | Puebla, Mexico | April 25, 2023

A webinar was held virtually at eScire on April 25 by project manager Brigitte Sebastian, in which various aspects of **how to use DSpace to publish data were discussed?**

The event was open to the public through the organization's social networks.

The poster is for a DSpace Talk webinar. At the top left is the LYRASIS logo, and at the top right is the eScire logo. In the center, the text 'DSpace TALK' is displayed, with 'DSpace' in a red rounded rectangle and 'TALK' in red. Below this, the main title '¿Cómo usar el DSpace para publicar datos?' is written in a large, bold, black font. On the left side, there is a circular portrait of Brigitte Sebastian, a woman with glasses and a blue top, wearing a black blazer. Below her portrait, her name 'Brigitte Sebastian' and title 'Gerente de proyectos' are written in white on a red background. To the right of the portrait, there is a calendar icon above the date '25 de abril de 2023', and a clock icon above the time '12:00 hrs. (GMT -6 CDMX)'. At the bottom, there is a red bar containing social media icons for Facebook, YouTube, and Instagram, followed by the text 'eScire', 'eScire_MX', 'eScire_', and the website 'www.escire.lat'.

In this webinar the project manager explained various topics and important aspects of how to use DSpace for data publishing.

Brigitte began by projecting her presentation and mentioning what types of data can be uploaded to DSpace, among these are word files, pdf, excel, power point, videos, images, songs, etc. She then detailed that the advantage of the repository is that a large number of files and data can be stored in the repository.

Subsequently, he explained that the advantage of the repository is that a large number of files and documents can be stored, the purpose of this is that over the years the DSpace will always store all these files and they will not be lost, given this, all the people who need this information will be able to consult it at any time.

The topics she addressed were: the structure of the documents to be uploaded, possibilities of repository styles, collections, file structure, vision of what I want the DSpace to contain, recommendations, among others.

Brigitte mentioned the importance of being very clear about what kind of information you want to have in the repository so that based on that information you can structure and give an image to the platform, also through the DSpace demo, the project manager showed how you can upload and configure each element that you want to upload to the repository, so that the audience can solve their doubts at the end of the presentation.

At the end of the session, Brigitte answered the various questions that the audience sent us through a form posted on our social networks, as well as questions and comments in real time.

Among the questions asked by the public were topics such as: metadata schema, access generation for DSpace, data repository, among others. At the end of the event, participants were invited to stay tuned for the next Dspace Talk activities to continue resolving doubts.
