

# 2011-09-13 - Special Topic - Fedora 3.6 Performance Planning

## Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: [11 am Eastern Daylight Time US \(UTC-4\)](#)
- Voice
  - Via Skype+: Dial from anywhere: \+9900827047086940 (callto://+9900827047086940)
  - Via Phone+: US Number: +1 (201) 793-9022, Room #7086940
- IRC:
  - [Join the #duraspace chat room via Freenode Web IRC](#) (enter a unique nick)
  - Or point your IRC client to #duraspace on irc.freenode.net

## Agenda

Discuss and get details on tests we want to do:

1. Black box (repeatable, at the HTTP level)
  - a. Characterizing the types of tests to run
  - b. Reporting requirements for 3.6 (what do we want to say?)
  - c. Frequency of routine test runs/reports
  - d. Other requirements?
    - i. Ability to run against Fedora 3.5 and 3.6
    - ii. Ability for users to run tests in other environments
  - e. Technology choice (JMeter, Grinder, etc)
2. White box (searching for and fixing bottlenecks)
  - a. Strategy/technology to use (log statements, Spring Insight, other profiling tools)

Who will drive each of these?

Rough timeline?
