Page Inclusions

There are few standard content, wiki syntax fragments and status banners that you can include to indicate common messages or formats on KnowledgeBase pages. To use the fragments copy the following into the Wiki Markup editor:

```
{include:KB:Incomplete}
```

"Incomplete"=indicates the fragment you wish to include. Choose from the children below or create a new child page for a new fragment for inclusion.

- Incomplete
- Indexpage
- KBDevel
- KBpurpose
- Outofdate
- Unreviewed
