Notes

Dragan asked Brian and Georgy whether they can be interested to participate in the project of integration of ORCID and VIVO in the case Lyrasis gets a grant. Georgy can participate only in TIB projects. Brian can be interested depending on his availability.

If we want to implement all features needed for certification of VIVO as an ORCID service providers (https://info.orcid.org/vendors-and-service-providers/csp-criteria-research-information-systems/) the rough estimation is that at least 20k USD are needed just for developers activities.

Dragan will open a GitHub ticket for discussion about the M1 mac chip and VIVO issue.

Dragan asked what is the best way to validate log4j is working properly after upgrading (https://groups.google.com/g/vivo-tech/c/nB4eA580WIQ), Georgy suggested using a developer panel for this purpose.

We should push forward reviewing PR. Brian hopes he might find some time for this activity. Georgy is currently occupied with improvements of the ABAC PR.
