

# SPARC DSpace User Group Meeting Topic Suggestions

We are looking for ideas for presentations (and presenters!), tutorials, discussions, etc. to include in the March 14 user group mtg which is immediately after the SPARC mtg. Some of the current ideas are:

- update on 1.8 and beyond
- innovative projects from the community
- tutorial on Discovery (faceted search and browse) or Mirage
- structured networking (this is always really well rec'd by attendess) - use a conversation starter, like: What are your current challenges with your repository /DSpace? Or what is your most pressing issue/s with your repository?

Please include your ideas/suggestions here or send me an email.
