Minutes

1) News/Other

Amy: what is does citation metadata mean to you? Maybe here's a resource: <http://dublincore.org/documents/dc-citation-guidelines/>

Bram: should DCAT help with updating language packs for 1.8?

- current packages: <https://wiki.duraspace.org/display/DSPACE/I18nSupport>
- many are not updated for 1.8
- might be that it is to challenging to figure out what specifically needs updating
- Bram to consult w/committees on what files need to be translated, touch base with original authors as well as the DSpace Ambassadors to get updates made
- [DSpace Developers' Virtual Summit](#) - periodic mtg for developers to discuss improvements for DSpace

2) "Action Item" status

- going forward, once the agenda is published (and before the mtg), everyone should update the status of their "Action Items"

3) [SPARC DSUG meeting](#) feedback - whether or not you are attending, what topics would you like to hear about at a user group mtg?

4) [OR12 DSUG topic](#) feedback - whether or not you are attending, any feedback/suggestions on mtg content look

5) Google Summer of Code possible projects, [last year's project summary](#)

- brainstorming on potential student projects - [metadata improvements](#), easy upgrade script [DS-456](#), others?

6 & 7) JIRA Issue Discussions

- going forward, all selected DCAT JIRA issues will be updated in JIRA, rather than in DCAT mtg notes
- all discussion leaders for any previously selected open JIRA issues should update JIRA w/the most current info
- if there is something more/new to be discussed or if we need to brainstorm on how to find developer resources, etc, it should be brought up during the monthly Thurs/Fri discussions or placed on mtg agenda
- we will no longer include any status updates in DCAT mtg notes - not public or dynamic enough
- DCAT members should schedule new issues discussions/additional issue discussion on the [DCAT Discussion Schedule page](#) - this page also includes an index of all DCAT selected issues

LAST TIME THE DETAIL BELOW WILL APPEAR IN THE MTG NOTES - GOING FORWARD DETAIL SHOULD BE PUT INTO JIRA

Old JIRA issue update

- DS587 tombstone (Sarah):[discussion forum,JIRA](#)
 - status as of last mtg:
 - some disagreement on tombstone reasons, what metadata would be displayed - discussion came up too late (Jose's version vs. Richard's)
 - still trying to get XMLUI tombstone reason for withdrawn item in to 1.8

- DS638 virus checking/check file format (Elin):discussion forum (https://wiki.duraspace.org/display/dsforum/DSpace+*+DS-638++check+files+on+input+for+viruses%2C+and+verify+file+format), [JIRA](#)
 - virus checking is in 1.8, file format checking is written and tested, but did not make it into 1.8
 - status as of last mtg:
 - dependent on curation task work that MIT, not quite done, trying to follow same format for virus checking
 - can do file format checking - but NOT at submission
 - Robin to create a separate JIRA issue for file format checking at submission-->[DS-1093](#)
- DS164 deposit interface for modifying input forms.xml (Jim): [discussion forum](#), [JIRA https://jira.duraspace.org/browse/DS-164](https://jira.duraspace.org/browse/DS-164)
 - GSoC project - do away with item-submission.xml and input-forms.xml and instead create an Admin UI that allows repo managers reorganize the submission UI
 - GSoC student wants to continue work on project
 - [sample screenshot wiki page](#)
 - status as of last mtg:
 - some muddling w/an adjacent GSoC project - Jim to resurrect original request and propose next steps
 - Per Robin - suggest break this issue into smaller tasks, starting with (It may be that there are already existing issues for some #2 looks to be addressed by [DS-464](#))
 - 1. A screen or screens to allow the administrator to edit the format of the metadata collection screens
 - 2. The ability to select the type of an item and collect appropriate metadata accordingly
- DS-560 XMLUI News in config dir (Bram): [discussion forum](#), [JIRA](#)
 - XMLUI interface is not as useful as JSPUI for news config, Bram proposed to have a more flexible front page
 - Do we have a DCAT consensus? If so, does it still make sense to hold a community-wide discussion for both feedback and developer resource identification?
 - going back to the priority of just making XMLUI news editable - Bram
 - 14/2: put a ping on JIRA to ask if a developer wants to take this on
- DS-456 create easy upgrade scripts (Iryna): [discussion forum](#), [JIRA](#)
 - no developer assigned yet
 - propose writing scripts for the most common database/operating sys
 - Database: PostgreSQL 264, MySQL 43, Oracle 39, Other 6
 - Operating Sys: Linux 224, Microsoft Windows 88, UNIX 28, Solaris 22, HP/UX 2
 - Michael to attach scripts to JIRA issue that they have developed
 - hold community-wide discussion/solicitation of other upgrade scripts already written or interested parties -->look at Iryna's announcement

New JIRA issues

- Added functionality to embargo feature (?DS-908, ?DS895, ?DS-824) - Jim
 - Univ of Michigan is embarking on a project with @mire to add functionality to the existing feature
- DS-1021 Add integration with an online document viewer (Amy) - [discussion forum](#), [JIRA](#)
 - discussion open now
