Add Nivo JQuery slideshow (Manakin)

In the example below Nivo slider is been added to a static page in Mirage theme. Same concept can be used to add the slideshow to any page on any Manakin theme.

Files Modified

- [dspace-src]/xmlui/themes/Mirage/lib/xsl/core/page-structure.xsl
- [dspace-src]/xmlui/themes/Mirage/lib/css/style.css

Files Added:

- [dspace-src]/xmlui/themes/Mirage/lib/js/[nivo-slider] (Download and extract Nivo slider and place it here)
- [dspace-src]/xmlui/themes/Mirage/lib/js/nivo-slider/jquery.min.js (Download the jquery.min.js and place it in the directory)
- [dspace-src]/xmlui/themes/Mirage/lib/js/nivo-slider/[slides] (Create the slides directory and place the slide images files in it)

Instructions:

1. Follow the Item #4 in this tutorial and create the static page about.
2. Add Nivo css to page-structure.xsl

```
<xsl:template name="buildHead">
   <head>
    ...
       <xsl:if test="starts-with($request-uri, 'page/about')">
          <link rel="stylesheet" type="text/css">
                <xsl:attribute name="media">
                   <xsl:value-of select="@qualifier"/>
                </xsl:attribute>
                <xsl:attribute name="href">
                   <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata
[@element='contextPath'][not(@qualifier)]"/>
                   <xsl:text>/themes/</xsl:text>
                   <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata
[@element='theme'][@qualifier='path']"/>
                   <xsl:text>/lib/js/nivo-slider/nivo-slider.css</xsl:text>
                </xsl:attribute>
           </link>
           <link rel="stylesheet" type="text/css">
              <xsl:attribute name="media">
                 <xsl:value-of select="@qualifier"/>
              </xsl:attribute>
              <xsl:attribute name="href">
                 <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata
[@element='contextPath'][not(@qualifier)]"/>
                 <xsl:text>/themes/</xsl:text>
                 <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata[@element='theme']
[@qualifier='path']"/>
                 <xsl:text>/lib/js/nivo-slider/themes/default/default.css</xsl:text>
              </xsl:attribute>
            </link>
        </xsl:if>
    ...
   </head>
</xsl:template>
```

3. Add Nivo Javascipt to page-structure.xsl

```
<xsl:template name="addJavascript">
  ...
   <xsl:if test="starts-with($request-uri, 'page/about')">
        <script type="text/javascript">
           <xsl:attribute name="src">
              <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata
[@element='contextPath'][not(@qualifier)]"/>
              <xsl:text>/themes/</xsl:text>
              <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata[@element='theme']
[@qualifier='path']"/>
              <xsl:text>/lib/js/nivo-slider/jquery.min.js</xsl:text>
           </xsl:attribute> </script>

        <script type="text/javascript">
           <xsl:attribute name="src">
                <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata
[@element='contextPath'][not(@qualifier)]"/>
                <xsl:text>/themes/</xsl:text>
                <xsl:value-of select="/dri:document/dri:meta/dri:pageMeta/dri:metadata[@element='theme']
[@qualifier='path']"/>
                <xsl:text>/lib/js/nivo-slider/jquery.nivo.slider.pack.js</xsl:text>
           </xsl:attribute> </script>

        <script type="text/javascript">
           $(window).load(function() {
              $('#slider').nivoSlider();
           });
        </script>
   </xsl:if>
  ...
</xsl:template>
```

4. Add Slide images to page-structure.xsl

```
<xsl:template match="dri:body">
   <div id="ds-body">
      ...
      <xsl:choose>
        <xsl:when test="starts-with($request-uri, 'page/about')">
           <div class="slider-wrapper theme-default">
                <div id="slider" class="nivoSlider">
                   <img>
                        <xsl:attribute name="src">
                           <xsl:value-of select="$theme-path"/>
                           <xsl:text>/lib/js/nivo-slider/slides/image-1.jpg</xsl:text>
                        </xsl:attribute>
                   </img>
                   <img>
                        <xsl:attribute name="src">
                           <xsl:value-of select="$theme-path"/>
                           <xsl:text>/lib/js/nivo-slider/slides/image-2.jpg</xsl:text>
                        </xsl:attribute>
                   </img>

                </div>
           </div>
        ...
      </xsl:when>
      <xsl:otherwise>
        <xsl:apply-templates />
      </xsl:otherwise>
   </xsl:choose>
  </div>
</xsl:template>
```

5. Add the Nivo css styles to the bottom of the style.css

```
.nivoSlider {
    position:relative;
    width:618px; /* Change this to your images width */
    height:246px; /* Change this to your images height */
    background:url(images/loading.gif) no-repeat 50% 50%;
}
.nivoSlider img {
    position:absolute;
    top:0px;
    left:0px;
    display:none;
}
.nivoSlider a {
    border:0;
    display:block;
}
```
