2023-12-21 Cornell LD4P3 Meeting notes

Attendees: Steven, Jason, Simeon

Regrets:

Linked-Data Authority Support (WP2)

- Qa Sinopia Collaboration - Meetings with Stanford will only occur on an as needed basis. Authority request issues: https://github.com/LD4P/qa_server/projects/1 (prioritized based on "important" authorities and ease of completion)
  - 2023-12-21
    - Created a spreadsheet of all cached lookups and API (0:1, N:1). Working with Stanford to see if it's technically possible to swap out lookups on the backend, rather than have template creators edit by hand.
    - Need to keep an eye out about Sinopia/Alma integration and how they provision for lookups. If they just use Stanford's Sinopia, shouldn't be any concern. If they spin up their own Sinopia and point to our QA, need to decide level of service we're willing/able to support.
    - Sizing work with CUL-IT for another sprint. There is current Sinopia development work but we don't know how long this will go on.
- Best Practices for Authoritative Data working group (focus on Change Management)
  - 2023-12-21
    - Nearly complete. Final round of editing. (for real this time)
      - Suggest quarterly meetings going forward.
      - Next couple meetings will be wrapping up and strategizing communications, who's going to answer the door when someone knocks.

Shared Cataloging Explorations

- SWIB workshop write-up
  - Draft done, will put in eCommons and share with participants

Other Topics

- POD & SHARE-VDE... should this team interact with that re: use cases, data analysis or other?
  - 2023-11-16 - POD data not yet loaded and may not be fully loaded until sometime in December; first chance to evaluate the full data likely in either December or January.
- FAST at CUL
  - 2023-09-28 - position paper drafted/ready; not yet shared administratively
  - 2023-10-19 - CUL Authorities in FOLIO Working Group in contact with product owner about getting $0s for FAST in exports and reports for nic/nacs. Many nic/nacs have been replaced with established FAST>
- BIBFRAME Interoperability Group (BIG) - Steven Cornell rep
  - 2023-09-28 Steven is facilitating the SHACL DC TAPS WG, and thinking about workflows for the use of SHACL. Another group working on requirements with a focus on monographs. Another group working on PCC profiles spreadsheet for DC TAP, intention is that it stay human readable yet be translatable to SHACL. There is a prototype SHACL validator in Sinopia
  - 2023-10-16, Fiddling with spreadsheets to get them to work with Sinopia SHACL prototype. First pass at bf:Works and bf:Instances for Monographs. Will need more decisions on shapes like Titles and Agents before we have meaningful validation/reports on instance data

Next Meeting(s), anyone out?:

No more...
