Managing Book Objects

The Books Solution Pack introduces some unique management functions to both book and page objects. This section will describe the book management functions.

The Book Management Tab

You can access the book management functions by navigating to a book object and clicking the 'Manage This Book' tab.

Collection Membership

The Collection Membership fieldset allows you to associate a book with more than one collection. Simply click the 'Add Book to Collection' link and choose a new collection to add the book to.

Islandora Downloadable V Islandora Virtual Environment	7M	Logout
Digital Repository DIY Interface	Create content Administer	
Home > Digital repository > Book Collect	tion > Elmsdale > Elmsdale

Description Pages Read		Object Details
Collection Membership Add Book to Collection New Collection: Islandora PDF Collection	Expand 'Collection Membership' and 'Add Book to Collection	
Add book to new collection Add Book to New Collection View Metadata	Choose a new collection to add the book to	
→ Update Derived Datastreams		
Manage Current Datastreams		
Permanently Delete this Book		

Once a book belongs to one or more collections, you will also have the option of removing it from any of those collections.

The book is now a member of two different collections.

Books must always belong to at least one collection, so you will not see the option to remove a book from a collection until it belongs to one or more collections.

Update Derived Datastreams

Islandora Downloadable VM Islandora Virtual Environment	Logout
Digital Repository DIY Interface Create content Administer	
Home > Digital repository > Book Collection > Elmsdale > Elmsdale	
Elmsdale	
Description Pages Read Purge all pages Manage This Book Object Details	
Collection Membership	
> View Metadata	
- Vpdate Derived Datastreams	
Update datastreams for all pages in this book. The stored tiffs will be used to create all derived datastreams.	
Refresh OCR for this book	
Refresh all derived images	
Recreate PDF from scanned text	
Update Page Datastreams	
→ Manage Current Datastreams	
Permanently Delete this Book	

- Refresh OCR: If you need to redo the OCR processing for the entire book (rather than one page at a time) you can do so by selecting this option.
 Refresh All Derived Images: Use this option to redo the image processing for every page in the book.
- Refresh All Derived Images: Use this option to redo the image processing for every page in the book.
 Recreate PDF From Scanned Text: This option may be useful if you add or remove pages from the book after the initial PDF is created on
- ingest.

Manage Current Datastreams

Normally found under the Object Details tab, this section lets you manually replace Datastreams for the book.

Belongs to these collections:		Book Collection Islandora PDF Collection				
All Datastreams

DF of Book	View		application/pdf			

Permanently Delete This Book

Normally, deleting book pages and the book object itself are separate processes, but this option lets you delete the book and all its pages at once. There are multiple confirmation steps to make sure you understand what you are doing.
