## Notes

### **Readme file, contribution, join the community**

It would be nice to have screenshots in the explanation of the process of contribution. The question is where to preserve images (screenshots). Georgy suggested creating a documentation directory and inside that contribution subdirectory. Dragan will discuss with the rest of the team.

### **VIVO 1.14.1**

Georgy thinks we should resolve relocating once when it is an issue, at the moment it works, and we don't know in which direction log4j will go in the future. This can simplify the process of publishing a patch for VIVO 1.14, because we have just to cherry pick existing commits from the main branch. Also, Dragan will cherry pick commit (<https://github.com/vivo-project/Vitro/pull/441>) and prepare VIVO 1.14.1

### **VIVO 1.15.0**

#### **I forgot my password**

Georgy and Dragan can't reproduce William's issue with email links. It might be discussed once again with William.

Georgy has additional suggestions for Ivan for improvement of the PR. It will be added in the PR discussion track.

#### **Avoid lock on graph uri update in RdfServiceSparql**

Might be postponed for VIVO 1.16.0

#### **Docker**

<https://github.com/vivo-project/VIVO/pull/3940>

Tested by Ian Slatter, tested and reviewed by Ivan Mrsullja (linux), reviewed by Dragan. Ready to be merged if no objection from the rest of the team.

#### **Freemarker dataGetter directive**

<https://github.com/vivo-project/Vitro/pull/440>

Ready to be merged if no objection from the rest of the team

#### **Role based search filters**

<https://github.com/vivo-project/Vitro/pull/442>

Reviewers needed! We need someone to test this feature.

#### **Profile linking with Matching ID doesn't work**

<https://github.com/vivo-project/Vitro/pull/444>,

The second reviewer is needed (Java code review, sparql, ontology, testing).

#### **Collated faux object properties are not displayed in user profile**

<https://github.com/vivo-project/Vitro/pull/443>

This PR might be classified as a small PR which requires only one reviewer.

#### **Suppress Display for object property in unrelated individuals hides property in related individual profiles**

<https://github.com/vivo-project/Vitro/pull/445>

This PR might be classified as a small PR which requires only one reviewer.

#### **Update jquery**

<https://github.com/vivo-project/Vitro/pull/449>

How to proceed? Which release? How to test?

Georgy suggested trying to decouple this PR in a couple of PRs, the first one is just adding a new jquery library, the others are part by part update of existing code to the new library.

#### **Sanitized search query**

<https://github.com/vivo-project/Vitro/pull/447>

Reviewed by Dragan, hopefully Ben will be the second reviewer.
