Notes

VIVO 1.14.1

Team analyzed the sonatype report - <https://sbom.sonatype.com/report/T1-118f0f57da8c6b3097cc-5c65f36277df-1710834400-5e3647c73e394277b38336fc7527c502>

There is no critical security vulnerability, but there are 44 threats. Some of them are transitive vulnerabilities. Hopefully, the upgrade of jena will remove some of those transitive vulnerabilities.

VIVO 1.15.0

Active

I forgot my password

<https://github.com/vivo-project/VIVO/pull/3916>

<https://github.com/vivo-project/Vitro/pull/421>

William, discussed an issue he encountered while testing this feature, which involved bizarre email and linking problems that he suspected might be due to user or environmental error. William agreed to continue testing, considering alternative methods like local VoIP and Google SMTP.

Date time interval doesn't allow end date to be equal start date

<https://github.com/vivo-project/Vitro/pull/453>

Dragan was wondering whether this is always an expected feature (for all time ranges assigned to different classes)? Georgy confirmed this request came from the VIVO customers.
