3. ORCID-VIVO integration

Notes

ORCID-VIVO integration

The team discussed estimation of tasks which can be implemented for the budget of the project. The committers think it is feasible to implement login by using ORCID credentials and pushing information from VIVO into the ORCID registry by using ORCID API for around 200 developer hours. Dragan will create a form for expression of interest in participation in the project and share that with VIVO developers/implementers.
