

DSpace 3.0 Tasks

This page may be out of date

This page is updated manually. Therefore it may be out of date at any given time.

3.0 Documentation Tasks

- Installation Documentation needs a check (after Maven Consolidation) & also make sure updated with build.properties (**Volunteer: Robin Taylor**)
- OAI 2.0 documentation needs moving & possible merging with existing OAI docs. May also want to search all our Docs for mentions of "OAI" to be sure there are no other pages needing updates (**Volunteer: Ivan Masár**)
- Configuration Documentation needs a quick check. Especially with the new JSPUI configs added to the dspace.cfg file, which may need to be documented at [JSPUI Configuration and Customization](#).
- Documentation for the new 'mobile' XMLUI theme
- We need an Upgrade from 1.8.x to 3.x page added under [Upgrading a DSpace Installation](#) & instructions added there.
- Update the [Preface](#) page for 3.0

3.0 Testathon Tasks

- Release 3.0RC1 via Maven (**Assigned: Sands Fish**)
- Update [demo.dspace.org](#) with the 3.0RC1 Release (once it appears in Maven Central) (**Assigned Tim Donohue**)
- Update the [DSpace Release 3.0 Notes](#) page. Try and create a simple table/list of the main features that people should expect & look to test. Use the [DSpace Release 1.8.0 Notes](#) as a good example.
- Announce Testathon start & all available test servers, etc.
 - May want to optionally create a Testathon Wiki page under the [DSpace Release 3.0 Notes](#), similar to the [DSpace Release 1.8.0 Testathon Page](#)

Bugs / Improvements / New Feature Tasks:
