

## Use case [stub]: Research data packages in multiple stores

Titl	Research data package sub-addressing
Prim ary Actor	Developer / Repository Manager
Scope	Technical
Level	quite high or quite low; depends
Story	Researchers wish to deposit arbitrary collections of research data for archiving. Example: DATABANK < <a href="https://databank.ora.ox.ac.uk/">https://databank.ora.ox.ac.uk/</a> > The system has to support packaged files (tar,zip) for datasets which can be very large (see separate use case for large file handling), while being able to sub address items within the package. (A disseminator could not this well.)
