

2012 VIVO Implementation Fest

Overview

- Presentation materials are now available on the [Workshops & Tutorials#2012](#) page.
- [Wolf Law Building](#) Workshop Rooms
 - Policy Track – Room 205
 - Technical Track – Room 204
 - Ontology Track – Room 330
- [Event page on vivoweb.org](#)
 - PARKING: Parking permits for Lot 470 are required for parking near the Law School and will be distributed to visitors at the registration table at 1:00pm, Monday, in the foyer on the first floor of the Law School. For those attendees from CU-Boulder, please use your usual parking area. The south end of Lot 470 (a single row) is actually Lot 473 which is reserved for smart meter parking.
 - OPEN EARLY! Room 207 in the law building will open Monday at 10am for those arriving early and wishing to wish to gather or to have an Internet connection.
- Wireless Internet access
 - For general Internet access, use the UCB Guest wireless network (complete terms of use dialog, no special password/sponsorship required)
 - If your institution's VIVO is behind a firewall and you wish to add an exception to allow access during the workshop, contact Alex Viggio for CU-Boulder campus IP range information
- Twitter tag: #VIVOifest12 (<https://twitter.com/#!/search/%23VIVOifest12>)
 - Related tags: @VIVOCollab (<https://twitter.com/#!/VIVOCollab>), #linkeddata (<https://twitter.com/#!/search/%23linkeddata>), #SemanticWeb (<https://twitter.com/#!/search/%23SemanticWeb>)

Proposed topics for lunch, dinner or open discussions

Contributing to the VIVO community as an Implementer?

- Documentation? Improving VIVO [Implementation wiki](#) content
- Support? Bi-weekly implementation call and vivo-imp-issues mailing list: how can we improve these, future call topics, invited speakers and demos?
- Outreach? Refreshing [vivoweb.org](#)

Other Resources of Interest?

- Other interesting Linked Data, Open Data or research data sets
- Other interesting ontologies and controlled vocabularies
- Other interesting Semantic Web/Linked Data tools or demos

VIVO Implementers Toolkit?

- Java tools
- DevOps? logging
- Test automation tools like Selenium
- AuthN or Security tools?
- Version control – SVN and Git

Meta-VIVO instance?

Setting up a VIVO of VIVOS to find VIVO experts, VIVO event attendees, info about instances and related resources...
