

Exception reports

Exception reports

back up to [User Stories: Defining features and functionality VIVO needs - September 2011](#)

User types involved

Narrative User Story (for sharing/review/voting)

to be written

Background

Exception reports are very important for identifying and resolving issues related to the usability of the application.

Wish list for improvement

The following should be included in the report:

1. System related errors
2. Errors triggered by user actions

The report can be displayed on the VIVO interface.

e.g.

2011-10-21 10:18:58,995 [PSet_TripleStore_RDB] Exception executing delete com.mysql.jdbc.exceptions.jdbc4.CommunicationsException:
Communications link failure

2011-10-21 10:27:26,614 [RDFDefaultErrorHandler] (line 1 column 1): Content is not allowed in prolog.

Technical considerations

Errors can be extracted from the log files.

Priority or staging considerations

See [NIHVIVO-3565](#) in the *"Site management and operational improvements"* component
