

OAI__DC to VIVO Information

Overview

OAI stands for the [Open Archive Initiative](#) founded to solidify and maintain the standards for open access repositories around the world. The standard for metadata format from an OAI repository comes in the form of

Development Links

OAI Protocol for Metadata Harvesting - <http://www.openarchives.org/OAI/openarchivesprotocol.html>

Dublin Core - <http://dublincore.org/>

Data Schema

OAI supports a variety of data standards. Inside the metadata tag each standard supported encompasses the xml data for its format. In the example below the metadata format is Dublin Core, oai_dc:dc.
