Milestone 5

Its all about the testing (Evaporator)

"Evaporating all the bugs"

Development

- Fix all release stopper bugs
- Score
- Transfer
  - Add delete model before import flag
  - Allow for loading from an record handler

Testing

- Implement Junit testing
  - Ensure Junit testing works

Process

- Build complete release script
  - This tool can be used http://sf-upload.sourceforge.net/
- Implement release process for Harvester
  - Create set of rules for staging
  - Create set of rules for commits
  - Create set of rules for packaging
- Implement release process for Virtual Appliances
  - Create set of rules for updating
  - Create set of rules for releasing

Building

- Implement local Maven repository to deal with 303 bug in Maven.
- Add rpm to maven build

Packaging

- Fix issues with vitural machines
- Ensure virtual machine creation is done as part of release (find a way to automate/semi-automate?)

Documentation & Demoing

- Ensure all wiki and other documentation is up to date.
