

Milestone 6

"It's all about the data" ([Fertilizer](#))

"Full of rich goodness"

- vivotest
 - all-star example of vivo installation with UF data and harvester
 - install joseki on vivotest (SPARQL!)
- Diagrams!
 - workflow diagrams for manual and automatic processes
 - diagram everything needed to run a vivo installation
- JDBC Fetch
 - Result Sets (Query or Point to Stored Procedure) << Would result in unlinked data
 - Black and White List for tables to ingest << Handled by Table Info
 - Detailed Table Information Entering
- XMLRecordOutputStream
 - Fix output splitting error for OAI data - Bug | 3061446
- Translate
 - Microformats
 - hCard
 - hGrant
 - hResume
 - hCalendar
- Scoring
 - Draft out a modular ability for scoring
 - Remove publication pre-conceptions
- Arg Parsing
 - Fix argument parsing for model overrides (ie, in transfer "input-model", "model name for input (overrides config file))
- Harvest
 - DSR Grants
 - People
 - Handle updates
- Sourceforge
 - create features page
 - fix splash page
 - Process flows for manual ingest
 - work with Sarah
 - work with Chris
- Wiki
 - Make wiki more prominent and accessible
 - add existing documentation to wiki
 - Document external contribution process
 - Document our development workflow in the wiki
- Performance
 - Jena SDB
