## Release Notes

### New and Improved

#### Updated versions of standard SPs

All standard Islandora 6.x solution packs have been updated for use in Islandora 7.x-1.1. These include:

- [Basic Image Solution Pack](#)
- [Large Image Solution Pack](#)
- [PDF Solution Pack](#)
- [Video Solution Pack](#)
- [Book Solution Pack](#)

#### Improved Large Image SP using OpenSeadragon viewer

The [Large Image Solution Pack](#) has been reconfigured to use [OpenSeadragon](#), a "framework agnostic and completely open version of the Ajax-based Deep-Zoom viewer."

#### Improved Book SP with robust configuration options

The [Book Solution Pack](#) has been improved both in terms of stability and in the range of configuration options available to the user.

#### HOCR Highlights in Book and Newspaper SPs

Highlighting functionality is provided through the [Islandora OCR](#) module, which integrates Tesseract into the Islandora Paged Content module. It allows for creation of OCR and HOCR derivatives that can be appended to a page as a datastream.

#### Improved Solr Client

The Islandora [Solr Search](#) has gained new tools and features from the 6.x version. Solr search in 7.x can be configured to allow for auto-complete fields and comes with new pre-made blocks for sorting and displaying query results.

### **Responsive Theming Support**

Islandora 7.x is designed to integrate cleanly with responsive Drupal themes such as [AdaptiveTheme](#) or [Aether](#)

### **MARCXML Module**

The [MARCXML Module](#) is a plugin that works with all solution packs to add new options to ingest and view metadata in [MARC](#) (MACHine Readable Cataloging) format.

### **FITS module for extracting and displaying technical info**

All standard solutions packs have been configured to work with the [FITS Extractor](#) modules, which adds technical metadata extraction via the File Information Tool Set ([FITS](#)).

### **Collection Manager**

The collection management interface has undergone improvements in functionality.

### **General Improvements**

Islandora 7.x-1.1 supports a new modular framework for viewers and other modules, most modules have gained a more detailed and robust set of configuration options over their 6.x predecessors, and a great deal of code clean-up has gone on behind the scenes to make this version of Islandora a much smoother and more stable piece of software since the beta release.

### **Known Issues**

- [Newspaper Solution Pack](#) is incomplete and will be released separately.
- Book and newspaper batch ingest is incomplete and will be released separately.
- Books and PDFs ingested into the D6 version of Islandora are incompatible with D7 Islandora due to changed Datastreams. These changes are relatively small and a migration script is forthcoming.
- Deleting a form does not delete its associations. To workaround: Recreate a form with the same name and remove the associations.

## Downloads

### Modules

#### Base

Component (Download Link)	Version	Documentation
<a href="#">Islandora Repository</a>	7.x-1.1	<a href="#">Link</a>
