 - `tsri:UnknownPerson` class that can be used to exclude individuals from search results
- UCLA –
- Weill Cornell –
- Cornell Ithaca –

Implementation Fest planning

- Will be held Thursday and Friday, April 25-26 in Boulder, Colorado, a 45-minute bus ride from Denver International Airport
- Read the vivoweb.org blog entry, and the [2013 VIVO Implementation Fest](#) page has information on transportation and hotels
- A [registration page](#) is now live – note that there is **no registration fee** for the workshop
- A **DRAFT** schedule is available for preview on sched.org (including for mobile view) and as a [Google Doc](#)
- There will be several ontology sessions at the event, including overviews of the existing ontology and recent [CTSAconnect](#) work on bringing the VIVO and eagle-i ontologies together. Working sessions will address open issues where improvements or extensions have been requested
- Nicholas Rejack will be offering his popular [SPARQL 101](#) and [SPARQL 201](#) sessions
- Please add suggestions for areas of discussion here, which we will try to accommodate in the schedule as we develop it.
 - Research grants – what are the differences between grants, awards, and contracts? How do NIH and NSF (and other funding agencies) model grants, so that VIVO can align data harvested from NIH RePorter or research.gov?
 - Distinctions among North American, British, continental European, Australian and New Zealand academic position types
 - The [Open Annotation Data Model](#) and its potential use to annotate researcher associations with areas of interest or expertise
 -
 -
- A **community hands-on development day** is planned as an optional additional activity on **Saturday** the 27th, e.g. working on internationalization
- Alex has been looking into options for videoconferencing certain events where interest is strong from people who can't attend
 - Stony Brook is generously offering use of their multi-point H.323 bridge to support better-than-desktop quality video

Current open issues

- From Mike Conlon: "How to represent that a person is no longer associated with the university? It's becoming more obvious that we have many people in VIVO that are no longer at UF. We need information representation, then display, and likely some places where formers are filtered out of displays and lists."
- Courses and semester classes
- Radio and TV programs
- [Representing and displaying re-publication or performance](#)
- Progress on the [Knowledge Mobilization Ontology interest group](#)
