2012-08-14 DfR Partners Meeting

Attending: Jonathan, Dan, Bill, Thorny, Mark

Discussion:

- We want to push content to Fedora and view it in Sidora
- We also want to demo the Smithsonian application with the Cerro Juan Diaz data
- DuraSpace will create an AMI from a stable release around the beginning of September
- Mark will speak to his devs to determine when we should get a stable AMI
- Mark will give us access to GitHub. We may install ourselves or DGI will do it and we will clone it (TBD)
- Bill will confer with Andrew about best way to create AMI
- Need to implement Shib
