Implementation and Development Call 20130613

Updates

- Colorado (Stephen and Alex)
  - working on reversing the direction of department-to-concept so you can see a list of concepts for a department's people
  - building scripts to use Vagrant which can generate development virtual machines -- also planning to work with Nicholas Skaggs on his Juju charm (similar to a Puppet script) to deploy VIVO on cloud Ubuntu/Debian VMs
- Cornell (Jim, Huda, BrianL and TimW)
  - Huda still on leave, but getting reconnected -- welcome back!
- Duke (Patrick)
  - collecting requirements from data consumers, like exposing new data fields, and other schools to be rolled out to Scholars@Duke
  - directing people towards Duke's VIVO data widgets
- Memorial (Lisa and Max)
  - Max hired as senior programmer analyst
  - presenting VIVO backend to stakeholders and presenting at a national conference CU Expo 2013 (public engagement conference -- academia and gov)
- Stony Brook (Tammy)
  - debugging integration of Web ID authentication with VIVO session object -- Jim indicating this might be difficult to do in a standard way given two servlet context objects (?) -- maybe there's a way to do this in Tomcat?
  - (Tammy figured it out. Use crossContext attribute in Tomcat. Then use ServletContext to store and retrieve objects.)
- UCSF (Eric)
  - finished latest OpenSocial integration into Profiles code, and hopes to apply the improvements to the VIVO code
- Weill Cornell (Paul)

VIVO webinars

- All slides and recordings are available online through DuraSpace

VIVO 1.6

- VIVO 1.6 release code freeze is July 22 to allow 3 weeks of testing before the VIVO conference
- See the VIVO 1.6 release planning or VIVO 1.6 JIRA issues and please comment
