

Implementation and Development Call 20130627

Calls are held every Thursday at 1 pm eastern time (GMT-5) – convert to your time at <http://www.thetimezoneconverter.com> – and note that the U.S. is on daylight savings time.

View and edit this page permanently at <https://wiki.duraspace.org/x/a84QAq>, or use the temporal [Google Doc](#) for collaborative note taking during the call.

Updates

- Colorado
 - Automation Moving Forward - New changes to SPARQLTranslator and ArgList in the VIVO Harvester that allows for the SparqlTranslator's input models to use a single configuration file (to VIVO) and multiple models. This paves the way for Colorado cleaning up our configuration files.
 - We will be releasing alongside VIVO 1.6 a new version of the Harvester also versioned 1.6. I'm hoping to include in this new version
 - SparqlTranslator
 - CSVtoRDF
 - Improved Testing
 - More example scripts
 - A few fixes
 - The pre-build for the VIVO-Vagrant image is complete and now I'm just scripting the startup for script and then we'll begin testing here and releasing it to the vivo-project on Github.
 - Our new VIVO server is coming along. We're readying it to test VIVO 1.6. Our intent is once 1.6 goes into freeze we'll run daily tests with our data and processes and contribute back to the community. The hope is that when 1.6 is released, we'll also be able to release it to production on our systems. We're hoping to rollout our SPARQL Server (perhaps only internally) and a revamped theme at the same time.
- Cornell
 - Manolo is leaving Mann Library for the Law School
 - Kind of quiet with Jon and Brian Lowe out
 - Tim is looking at ISF ontology changes
 - Substantial changes to custom forms and listviews
 - Main changes for the ISF are
 - the role property
 - the conversion to numeric URI's
 - In connection with a school in Mexico who are happy to help with the translation to VIVO in spanish
 - Jim is taking time this week to focus on multi-site search
 - Brian Caruso returns from paternal leave
- Duke
 - Working on secondary rollout
- Memorial (John & Max)
 - Getting up to speed (with several development servers online)
 - Still working on the testing environment
- Stony Brook
 - Up the the same old same old ... trying to take over the world
 - Basic WebID authentication is working now, if you log into VIVO you are authenticated to other sessions and vice versa.
 - Could present it next week (or the following)
- UCLA (Lakshmi)
 - Looking at different publication ingest mechanism
- Weill Cornell
 - Eliza is working on improving the logging mechanism for ingesting publications
 - Half of the people in their Faculty Affairs database do not have any institutional identifiers
 - Messy data botches their scheduling plans for ingest
- UCSF
 - Taking a deeper look at ORCID Integration
 - got an update of jsonld
 - A lot of their folks grab their data from a client side language not a server side language and jsonld makes that easier
