2013-07-30 FF OAI-PMH Mtg

Attendees

- Andrew Woods ⭐
- Dr. Arif Shaon
- Jon Gibson
- Harry R. Sidhunata

General

- Indicates who took minutes - ⭐
- Call-in: Google-hangout at:
    - https://plus.google.com/hangouts/_/event/ccnv0ba94h3fb2je3gscunqc49g

Agenda

1. What should the service look like
2. How will we approach development
3. Who will be involved in development
4. Who will be involved in validation

Minutes

Jon

1. Just beginning with Fedora, and decided to start with Fedora4
2. OAI-PMH will be serving dublin-core
3. Willing to work with UNSW requirements to start
4. Interested in learning how to develop over Fedora4
    - Will document how to create a Fedora4 module

Arif and Harry

1. Interested in getting involved with the code
2. Currently using jOAI over Fedora
    - Would be interested in not using jOAI if not necessary with Fedora4
3. Primo used to harvest from Fedora
4. Some initial thoughts
    - Want to show deleted records in OAI responses
    - Need to be able to support requests for sets of records
    - Need to service: rdf, dc
    - Would like to directly service rdf from repo

Next Meeting

- Tues, Aug 6th @6:30pm ET

Actions

- Jon Gibson to create module, using fcrepo-transform as an example
- Jon Gibson to document how to create an external web module
- Dr. Arif Shaon, Jon Gibson, Harry R. Sidhunata to share git handles: (arifshaon, hsidhun)
- Dr. Arif Shaon to create OAI-PMH service requirements on wiki
