

Installing Dependencies and Pre-Setup

Install Java 6 jdk

Open a command line interface and enter the following:

```
apt-get install sun-java6-jdk
```

For other variants you may have to add other repos or manually download and scp.

Setup mySQL databases

Assuming an existing mySQL installation, execute the following:

```
create database [fedoradatabase];
create database [drupaldatabase];
GRANT ALL ON [fedoradatabase].* TO [fedoradbuser] IDENTIFIED BY [password];
GRANT ALL ON [drupaldatabase].* TO [drupaldbuser] IDENTIFIED BY [password];

flush privileges;
exit
```
