

Metadata Team Sept 30, 2013

What could we get into 4.0? pull request by Oct 7, all work doesn't need to be finished but some kind of code needs to be in

- Richard tool and preliminary mapping - need to test
- should we add DC terms as an extra registry, but would have no OAI done for it
- should we admin schema
- --> not enough time, should really have some documentation to accompany/describe

Next steps - review groups - recruit specific people to get involved

1) feedback on all mappings

- dc terms mapping - need DC experts
- update dc
- admin - need dev expertise
- local

2) feedback on project staging
