2	JIRA discussion • **DS-1453** (Ivan/cmtr request for DCAT input): repository content analysis - "This issue serves to collect requirements from repository managers and DCAT about what kinds of reports they would like to see in a proposed content analysis module. It has been often requested, but almost no requirements have been stated so far. ○ We posted: "DCAT had a preliminary discussion and believe a content analysis module would be nice to have, but also rank the priority as fairly low. There has been work in the community to build analysis outside of DSpace (recent presentation at OR13 by Terry Brady from Georgetown http://or2013.net/sessions/focus-your-content-not-ingesting-your-content) which may be useful to refer to. DCAT members will post their suggestions of what reports they think would be useful directly to this issue over the next few weeks." Anyone have some suggestions to add? • Pick 2 to discuss: "New Feature Requests": https://jira.duraspace.org/secure/IssueNavigator.jspa?sorter/field=issuekey&sorter/order=ASC • https://jira.duraspace.org/secure/IssueNavigator.jspa?mode=hide&requestId=10238 • Pick 2 to discuss: "More Detail Needed": https://jira.duraspace.org/secure/IssueNavigator.jspa?sorter/field=issuekey&sorter/order=ASC	Val
