

# Upgrading From 1.1 to 1.1.1

In the notes below `[dspace]` refers to the install directory for your existing DSpace installation, and `[dspace-1.1.1-source]` to the source directory for DSpace 1.1.1. Whenever you see these path references, be sure to replace them with the actual path names on your local system.

## Upgrade Steps

Fortunately the changes in 1.1.1 are only code changes so the update is fairly simple.

1. Take down Tomcat.
2. It would be a good idea to update any of the third-party tools used by DSpace at this point (e.g. PostgreSQL), following the instructions provided with the relevant tools.
3. In `[dspace-1.1.1-source]` run:

```
ant -Dconfig= [dspace]/config/dspace.cfg update
```

4. If you have locally modified JSPs of the following JSPs in your `[dspace]/jsp/local` directory, you might like to merge the changes in the new 1.1.1 versions into your locally modified ones. You can use the `diff` command to compare the 1.1 and 1.1.1 versions to do this. The changes are quite minor.

```
collection-home.jsp
admin/authorize-collection-edit.jsp
admin/authorize-community-edit.jsp
admin/authorize-item-edit.jsp
admin/eperson-edit.jsp
```

5. Restart Tomcat.
