Notes

CXF dependencies

```
<dependency>
  <groupId>org.apache.cxf</groupId>
  <artifactId>cxf-rt-frontend-jaxws</artifactId>
<version>${cxf.version}</version>
</dependency>
<dependency>
  <groupId>org.apache.cxf</groupId>
  <artifactId>cxf-rt-transport-http</artifactId>
  <version>${cxf.version}</version>
</dependency>
<!-- Jetty is needed if you're using the CXFServlet -->
<dependency>
  <groupId>org.apache.cxf</groupId>
  <artifactId>cxf-rt-transport-http-jetty</artifactId>
  <version>${cxf.version}</version>
</dependency>
```

VS

```
<dependency>
  <groupId>org.apache.cxf</groupId>
  <artifactId>cxf-bundle</artifactId>
  <version>2.4.0</version>
</dependency>
```

Candidates for removal or revision

`ReadOnlyContext.getSoapContext()`

`*.wsdd`

`org.fcrepo.server.utilities.TypeUtility.convertValidationToGenValidation()`

`org.fcrepo.server.utilities.TypeUtility.convertRelsTupleToGenRelsTuple`

`org.fcrepo.server.utilities.TypeUtility.convertDataStreamToGenDataStream`

`fcrepo-installer/src/main/assembly/fedora-home.xml` (some `*.wsdd` stuff)

Use of native axis classes

- `org.fcrepo.soapclient.FedoraAccessSoapServlet`
- `fcrepo-server/src/main/java/org/fcrepo/server/test/TestClientAPIA.java`
- module `fcrepo-security-pep`
- module `fcrepo-client-admin`

For the discussion

@StreamingAttachment(parseEagerly = true, memoryThreshold = 40000L)

Exceptions handling

they are not part of the WSDL and perhaps they should be (<https://jira.duraspace.org/browse/FCREPO-52>)

Other

<https://jira.duraspace.org/browse/FCREPO-728> deprecation of attribute "force" in API-M

org.fcrepo.server.storage.types.Datastream fields should have getters

in security.xml (installer)

```
<security:intercept-url pattern="/management/getNextPID" access="${security.ssl.api.management}" />
<security:intercept-url pattern="/management/getNextPID" access="${security.ssl.api.management}" />
```

<https://jira.duraspace.org/browse/FCREPO-16> ??

*.xsd -> fcrepo/resources/xsd?
