Structure - Support for derivative objects

Title (Goal)	Structure - Support for derivative objects (e.g. thumbnails, coversheets)
Primary Actor	End User
Scope	
Level	
Story (A paragraph or two describing what happens)	Derivative Objects are needed in DSpace to support dissemination of the original content in alternate formats. Cases where derivative formats are needed: • Text extraction for full text search • Thumbnail and preview image rendering for User interface • Alternative Image formats for preview tools (JPEG2000, @MIRE Image Zoom Tiles) • Alternative Audio / Video formats (Ex: Flash and MPEG conversion for streaming purposes)
