Structure - Metadata for all levels of object hierarchy

Title (Goal)	Structure - Metadata for all levels of object hierarchy (e.g. for Communities and Collections)
Primary Actor	End User
Scope	
Level	
Story (A paragraph or two describing what happens)	Users should be able to manage metadata descriptions related to any DSpaceObject. It should be possible to assign a "Profile" or "Template" that defined Metadata field, type, requirement, syntax, authority control. This support should operate independent of mechanism of deposit (submission, sword deposit, item import).
