

Structure - Manage Lists, Controlled Vocabularies and Authority Control

Title (Goal)	Structure - Manage Lists, Controlled Vocabularies and Authority Control
Primary Actor	System Human
Scope	
Level	
Story (A paragraph or two describing what happens)	Users should be able to manage Authority Control data without restarting or rebuilding DSpace. Authority Control sources includes input-forms lists, hierarchical vocabularies, external sources and dspace metadata fields). DSpace specific Authorities should be able to be managed from a common user interface (similar to Metadata and Format Registries) and/or import format.
