LD4L Use Cases

Go to

Archived

🛑 **LD4L 2014**, which was the Linked Data for Libraries original grant running from 2014-2016, has been completed. This page is part of the archive for that grant.

These use cases are work in progress...

The work of LD4L is heavily informed by use cases. If Linked Data is going to be "fit for purpose" and deliver value in a library context, its essential to know the users, uses and hoped for benefits for leveraging linked data.

Building on and distilled from the preliminary use cases and a revised subset , this page represents a further refined set of use cases to guide the ontology and engineering work for the project. The use cases divide into six "clusters" reflecting the data available to research institutions and libraries, and the core LD4L mission of leveraging the intellectual input of librarians, domain experts and scholars as they produce, curate and use scholarly information resources.

Cluster 1: Bibliographic + curation data

Use Case 1.1: Build a virtual collection

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 1.1: Build a virtual collection'.

Use Case 1.2: Tag scholarly information resources to support reuse

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 1.2: Tag scholarly information resources to support reuse'.

Cluster 2: Bibliographic + person data

Use Case 2.1: See and search on works by people to discover more works, and better understand people

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 2.1: See and search on works by people to discover more works, and better understand people'.

Cluster 3: Leveraging external data including authorities

Use Case 3.1: Search with Geographic Data for Record Enrichment and Pivoting

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 3.1: Search with Geographic Data for Record Enrichment and Pivoting'.

Use Case 3.2: Search with Subject Data for Record Enrichment and Pivoting

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 3.2: Search with Subject Data for Record Enrichment and Pivoting'.

Use Case 3.3: Search with Person Data for Record Enrichment and Pivoting

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 3.3: Search with Person Data for Record Enrichment and Pivoting'.

Use Case 3.4: Authority tool for more accurate data entry

> **Error rendering macro 'excerpt-include'**
>
> No link could be created for 'Use Case 3.4: Authority tool for more accurate data entry'.

Cluster 4: Leveraging the deeper graph (via queries or patterns)

Use Case 4.1: Identifying related works

> **Error rendering macro 'excerpt-include'**

No link could be created for 'Use Case 4.1: Identifying related works'.

Use Case 4.2: Leverage the deeper graph to surface more relevant works

Error rendering macro 'excerpt-include'

No link could be created for 'Use Case 4.2: Leverage the deeper graph to surface more relevant works'.

Cluster 5: Leveraging usage data

Use Case 5.1: Research guided by community usage

Error rendering macro 'excerpt-include'

No link could be created for 'Use Case 5.1: Research guided by community usage'.

Use Case 5.2: Be guided in collection building by usage

Error rendering macro 'excerpt-include'

No link could be created for 'Use Case 5.2: Be guided in collection building by usage'.

Cluster 6: Three-site services

Use Case 6.1: Cross-site search

Error rendering macro 'excerpt-include'

No link could be created for 'Use Case 6.1: Cross-site search'.
