

Technical Working Group Charter

Composition & Reporting Relationship

- The Technical Working Group (TWG) is appointed by the Leadership Group (LG)
- Membership by nomination / invitation of the LG
 - Open to Leaders & Steering Group Members
 - The LG may also selectively invite key members of the community from beyond the Leaders/SG to participate
- Reports output to Leadership Group
- Accountable to the Leadership Group
- Target 5+ members initially; may cap group membership if unwieldy
 - Membership must include at least one Fedora committer (i.e. a developer who is not a member of the Leadership Group)
- Term = 3 months
- Current members:
 - Forthcoming

Responsibilities and Outcomes

- The TWG will undertake an on-going technical review of Fedora, including:
 - Validation of components and APIs
 - Assessment of core vs. modular features
 - Identification of any questions or concerns about Fedora 4.0 architecture in the context of the project's goals, objectives, and use cases
- The technical review will focus on hands-on testing and analysis
- The TWG will submit a report to the LG
 - The report will include a technical analysis of Fedora 4.0
 - Where possible, conclusions will be backed up with test results
 - The report will include recommendations for future development, architectural direction, and future investigation

Meeting Frequency:

- The TWG will meet virtually once per month
