

# Contributor Projects

Fedora Commons invites you to contribute to the community code offerings. In the child pages we have a number of proposed mini-projects which community members have requested but have not been implemented. When all is said the Fedora Commons developer cannot do everything; it takes a development community. There is a lot of talent in our community and we would very much like you to join the team.

Please look at the pages in this section. Add to them. Comments on the ideas. Claim a mini-project.
