Conference Talk Collaboration Ideas Board

Have an idea for a conference talk, but are looking for collaborators or don't want to do it alone? Look no further! This section is intended to provide a space where interested individuals can submit an idea they have, and recruit collaborators. You can also submit topics for talks/panels you would like to see and help identify what conferences it would be best suited for.

Submitting your name to this list <u>does not</u> commit you to participation, but is intended to act as a resource for community members looking for collaborators. All communications between interested parties should be handled individually and is not the responsibility of the Fedora Program Team.

Idea	Summary	Name	Institution	Contact email	Notes
eg. Optimizing OCFL implementations	Showcasing different ways institutions have structured their data to "optimize" OCFL • Great for sharing best practices for implementation • Demonstrates multiple use cases for OCFL	Arran Griffith	Fedora	arran.griffith@lyrasis.org	Would be looking for 2-3 institutions to share their experiences
