

End User - Discovery and retrieval of content on mobile devices

Title (Goal)	Being able to find and retrieve metadata and files on devices with smaller screens, particularly phones and tablets
Primary Actor	Human
Scope	UI
Level	
Story (A paragraph or two describing what happens)	Sally hits a link on google that points to a DSpace item page. Being used to websites being optimized for mobile devices, she expects to see a clean page, optimized for mobile access that loads fast enough over her Edge/3G/4G/Wifi connection.
