End User - Visual collection browsing

Title (Goal)	Enabling more visual appealing access to items in a collection
Primary Actor	Human
Scope	UI, Collection/Community/Home pages
Level	
Story (A paragraph or two describing what happens)	Sally finds her way to a collection homepage of a photograph collection. She sees the standard item list featuring relatively small thumbnails. She expected a visual gallery view that would have enabled her to flick through larger representations of the thumbnails / actual photographs.
