2014-08-20 - Fedora Technical WG Meeting

Time/Place

- Time: 12:00pm Eastern Daylight Time US (UTC-4)
- Place: Google-hangout, https://plus.google.com/hangouts/_/event/c1glu6soq43r1rr6ou17qtobug8

Attendees

- Andrew Woods
- Esme Cowles
- Chris Beer ⭐
- ~~Daniel Davis~~ *
- ~~Declan Fleming~~
- A. Soroka
- ~~Benjamin Armintor~~
- Zhiwu Xie
- Neil Jefferies (having issues with may data connection - may not be in the call if I can't fix it!)
- Yinlin Chen

Note-taker = ⭐
Previous note-taker = *

Agenda

1. Review of areas of assessment
   Action Item: Enhance descriptions of different areas (particularly 6, 7, and 8)
2. Architecture walk-through
   Notes as comments on the wiki page.
3. Review to-date performance testing summary
4. Assign owners to (some number of) areas of assessment
5. Thought exercise: "What would be the technical "risks" of releasing 4.0 Production *now*"?
   a. Or another way, "Where do we want to put next sprint's dev energy"?

Discussion

- Architecture walk-through
  - Message-emitter should be added to F4 diagram
  - Do we need two diagrams? - no
    - as implemented
    - aspirational
  - It would be beneficial to define ci-tests
- There was interest in testing how to extend the code
- Next meeting: Wed meeting next week 8/27 at noon ET

Actions

- ✅ Esme to investigate current ModeShape development roadmap and how it aligns with F4
  - clustering, etc
- ~~Adam and Ben to assess REST-API (goal of versioning this API)~~
- ✅ Dan to enhance descriptions of "Areas of Assessment" numbers 6, 7, and 8

- ~~Neil to define initial set of system CI tests~~
