Stats/Metrics - Allow repository admin to make usage statistics anonymous

Title (Goal)	Statistics: Allow repository admin to make usage statistics anonymous
Primary Actor	Administrator
Scope	
Level	
Story (A paragraph or two describing what happens)	As a repository administrator at an institution that does not track usage by specific users, I would like to have the option to suppress user login information from statistics system. It could be useful to track authenticated vs unauthenticated usage or faculty vs student access. See SolrLogger.SolrInputDocument(), e.g. https://github.com/DSpace/DSpace/blob/master/dspace-api/src/main/java/org/dspace/statistics/SolrLogger.java#L374
