

Islandora Scholar

Introduction

Islandora scholar is a suite of modules designed to help Islandora function as an Institutional Repository. However, these modules can be helpful in other contexts.

Sample Features

- Integrates with Sherpa/RoMEO.
- Attach PDFs to citation records.
- Objects or PDF datastream of object can be embargoed and embargoes can be managed.
- CSL for citation display and citation export.
- Various citation batch ingest options (RIS, EndnoteXML, PMID, DOI, RefWorksXML).
- Islandora Google Scholar module improves discovery.
- Citations exposed via OAI using the [Islandora OAI module](#).

Requirements

This module requires the following modules/libraries:

- [Islandora](#)
- [Tuque](#)

Installation

Install as usual, see [this](#) for further information.

Modules installed by Islandora Scholar & Configuration

- Islandora Scholar
 - Configure at **admin/islandora/solution_pack_config/scholar**. You will see a page like this, with options to enable RoMEO, Google Scholar Search, and to override the default COinS display. You need to override the default COinS display if you want to use the [Islandora Solr Metadata Module](#) to author your metadata display.

Romeo Configuration

Various parameters used by RoMEO

☐ Enable RoMEO attempts.

Whether or not we should even try getting information from RoMEO.

Sherpa/RoMEO URLThe URL to which to make requests.

Sherpa/RoMEO API KeyYour institution's key to access RoMEO.

ISSN cache timeThe amount of time in days for which to maintain an ISSN value obtained by scanning an object.

RoMEO cache timeThe amount of time in days for which to maintain a copy of the markup for a given ISSN.

Google Scholar Search Configuration

Various parameters used by Google Scholar Search

☐ Render Google Scholar Search link

Enable Searching in Google Scholar.

☐ Use Standard Metadata Display

Check to use standard Islandora metadata display instead of COinS.

☐ Let users choose display CSL

In object view let the users choose which CSL to use.

Save configuration

At the top-right there should be three tabs:

BASIC CONFIGURATION

DOI IMPORTER

PDF CONFIGURATION

The DOI Importer configuration page looks like the screenshot below, and contains options for configuring the DOI importer.

DOI OpenURL

The URL which we will query to obtain our CrossREF information.

OpenURL PID

An identifier to call yourself, for the OpenURL endpoint. To use this service you first need to register for an account here: <http://www.crossref.org/requestaccount/>

Save configuration

The PDF Importer configuration page looks like the screenshot below, and contains options for configuring the way PDFs work on the site:

TEXT

Extract text streams from PDFs using pdftotext

The extracted text stream is added as FULL_TEXT datastreams and are indexed into Solr. Uploading a text file takes priority over text stream extraction.

Note: PDFs that contain visible text do not necessarily contain text streams (e.g. images scanned and saved as PDFs). Consider converting text-filled images with no text streams to TIFFs and using the [Book Solution Pack](#) with OCR enabled.

Path to pdftotext executable

/usr/bin/pdftotext

✓pdftotext executable found at /usr/bin/pdftotext

THUMBNAIL

Settings for creating PDF thumbnail derivatives

Width

200

The width of the thumbnail in pixels.

Height

200

The height of the thumbnail in pixels.

PREVIEW IMAGE

Settings for creating PDF preview image derivatives

Max width

500

The maximum width of the preview in pixels.

Max height

700

The maximum height of the preview in pixels.

Save configuration

- RIS Importer - creates citation objects from RIS files
- CSL - Allow for the storage/retrieval/validation of CSL 1.0.1 styles
 - Add new CSL styles at **admin/islandora/tools/csl**

STYLE NAME		DELETE
APA	Is Default	Delete
Test Style	Set Default	Delete
Test Style2	Set Default	Delete
Name	Upload A CSL Style <input type="text"/> No file chosen <small>Choose File</small>	Add

- Pubmed Importer - creates citation objects from Pubmed IDs
- Endnote XML Importer - creates citation objects from Endnote XML
- Islandora Scholar Embargo - supports embargo management
 - Configure at **admin/islandora/solution_pack_config/embargo**

On the main page, you can set the content models for objects to be embargoed. When a content model is selected, users will be provided with the option of setting a date for the embargo to be lifted, or to embargo an object indefinitely.

Select Content Models for objects to be embargoed

Objects defined by selected Content Models will be eligible for embargoing.

PID	CONTENT MODEL
<input checked="" type="checkbox"/> ir:citationCModel	Citation Content Model
<input type="checkbox"/> islandora:collectionCModel	Islandora Collection Content Model
<input type="checkbox"/> islandora:sp-audioCModel	Islandora Audio Content Model
<input type="checkbox"/> islandora:sp-basic_image	Islandora Basic Image Content Model
<input type="checkbox"/> islandora:pageCModel	Islandora Page Content Model
<input type="checkbox"/> islandora:bookCModel	Islandora Internet Archive Book Content Model
<input type="checkbox"/> islandora:compoundCModel	Islandora Compound Object Content Model
<input type="checkbox"/> islandora:sp-large_image_cmodel	Islandora Large Image Content Model
<input type="checkbox"/> islandora:sp-web_archive	Islandora Web ARChive Content Model
<input type="checkbox"/> islandora:sp-videoCModel	Islandora Video Content Model
<input type="checkbox"/> ir:thesisCModel	Thesis Content Model
<input type="checkbox"/> islandora:sp-pdf	Islandora PDF Content Model
<input type="checkbox"/> islandora:newspaperCModel	Islandora Newspaper Content Model
<input type="checkbox"/> islandora:newspaperissueCModel	Islandora Newspaper Issue Content Model
<input type="checkbox"/> islandora:newspaperPageCModel	Islandora Newspaper Page Content Model
<input type="checkbox"/> islandora:OACCModel	Islandora Annotation CModel
<input type="checkbox"/> islandora:oralhistoriesCModel	Islandora Oral Histories Content Model

Configure Embargo

Reset to default

From a tab at the upper right tab you can manage embargoed objects:

EMBARGO SETTINGS

MANAGE EMBARGOED ITEMS

On this tab a table will show you a list of objects that are currently embargoed:

LABEL	PID	TYPE	EMBARGOED UNTIL	MANAGE
There are no embargoed entries				

SEARCH

Welcome to the Islandora Sundex installation. This sundex contains all of the modules released alongside Islandora 7.x-1.3. Learn more about this release and its

- Islandora Google Scholar - provides meta tags to help indexing in Google Scholar and Zotero
- Islandora Bibliography - Allows user to build and export bibliographies
 - Requires the [Islandora Bookmark Module](#)
- Citation Exporter - Exports a collection of citations to either an RIS/RTF/PDF file
- DOI Importer - creates citation objects from DOIs (requires registration with CrossRef)
- Bibutils - Provides a PHP interface to the bibutils tools. Found here <http://sourceforge.net/p/bibutils/home/Bibutils/>
